Trust Your Supplier

Transforming the Supplier Experience

VS.

Multiple Profiles

Multiple copies of supplier data - one for each of their clients via different submission methods.

Single Profile

Suppliers control one single digital profile for minimal effort to submit to all connected clients.

VS.

Repetitive Process

An endless loop of administrative tasks repeated for each customer.

Update Once

Connected clients will see updates instantly.

VS.

Lack of Data Control

No way to track or manage information and confidentiality once sent to customers.

Identity Control

Information is owned & controled by the supplier. Blockchain Platform ensures data is secure.

VS.

Fragmented Market Opportunity

High customer acquisition costs & massive effort to gain new business.

Discoverable

Network brings new business opportunities to the supplier.

Additional Benefits

Standardized Questionnaires

Cross-industry questionnaires reduce workload to submit information to multiple customers.

Gain Insights

Free & Premium services let you see how you appear to buyers, which provides actionable insights to improve your risk profile.
